

## INDEX WEBINAR “OSTEOPATHIC APPROACH IN NEWBORNS WITH REFLUX”

Teacher. Antonio Daniele D.O.

- Classification, clinical and differential diagnosis
- Gastroesophageal reflux disease (GERD)
- Vomit
- Other possible causes:
  - o Gastric rotation
  - o Importance of the diaphragm
  - o The pressures
  - o Esophagitis
- Symptoms
- Medical drugs for GERD
- Anatomy:
  - o Esophagus and sphincters
  - o Innervation of the esophagus
  - o Diaphragm
  - o Frenic Nerve and diaphragm
  - o Frenic – esophagus ligament
- Techniques
  - o Gastric rotation technique
  - o Hepato-gastric rotation technique
  - o BLT dorsal spine and gastro-esophagus junction
  - o BLT upper dorsal spine – esophagus
  - o BLT C0 – gastro esophagus junction
  - o Direct diaphragm technique
  - o BLT hyoid - gastro esophagus junction
  - o BLT C5-C6 and gastro esophagus junction
  - o Direct Occipit-Mastoide technique (OM suture).
